

## Bar Code Enabled Data Collection Software

### Create Bar Code Enabled Applications in Minutes

TracerPlus offers small businesses and large enterprises the ability to create powerful data collection applications in minutes. Common tasks such as asset management, inventory control, and many others become fast and easy with TracerPlus. No programming knowledge is needed - just create your familiar forms, such as inventory audit sheets and material receipts, right on your PDA.

### What is TracerPlus?

TracerPlus is user configurable, data collection software that incorporates time saving features designed to speed data entry while reducing user error. Non-Programmers can utilize these features to create and deploy up to thirty two enterprise class mobile applications. Applications can later be modified at any time in order to further streamline data capture and maximize data accuracy.

### Real Time Data with TracerPlus

Wireless Mobile Applications are no longer only a privilege for those with big budgets! TracerPlus Wireless Server enables companies of any size to create custom enterprise class wireless applications. TracerPlus Wireless Server combines the power of TracerPlus with an easy to configure Wireless database server that is simple to connect to most databases via ODBC. Now it is easier than ever to configure and deploy customized wireless applications to your workforce.

### Software Highlights

- 10 - 30 user configurable bar code enabled fields
- 32 customizable sessions (databases).
- Customizable drop down lists
- Application deployment tools
- Signature Capture
- Calculated fields
- Lookup tables
- Date time stamps
- Pop-up keypads and calculators
- Validation fields
- After scan settings

### Highlighted TracerPlus Applications

- Inventory Audits
- Asset Management
- Route Delivery Management
- Mobile Sales
- In Process Quality Control
- In Field Surveys
- Pick List Verification
- Retail Price Verification
- Security Access Control / Tracking
- Vendor Managed Inventory
- Work In Process Management
- Tool Room Management
- Trade Show Visitor Tracking
