POINT - OF - SALE

*Big Business Tools. Small Business Attitude.*

Wasp Barcode Technologies' Point of Sale (ePOS) solutions are designed to help independent retailers run faster, more efficiently while providing customers with the service they demand. Wasp's easy-to-use, ePOS barcoding solutions provide the tools that bigger retailers use but without the complexity or cost associated with those complex ePOS systems. Whether you're opening your first retail store or you're expanding operations, Wasp's Point of Sale solution will improve your business efficiency. Lower costs of operation, improved sales and higher customer satisfaction will help make your business a success.

Wasp POS software tracks inventory to give you instant insight into what's moving, what's not and what needs to be reordered. The ePOS software can process customer credit card and sales transactions providing quick and accurate tally of sales.

The Wasp ePOS hardware solution is a complete ePOS system that includes a ePOS cash drawer, a ePOS keyboard that can read credit cards, a point of sale pole display, a ePOS receipt printer with fast, high-quality printout. Wasp provides this ePOS solution in an integrated solution or as individual ePOS devices.

POINT - OF - SALE

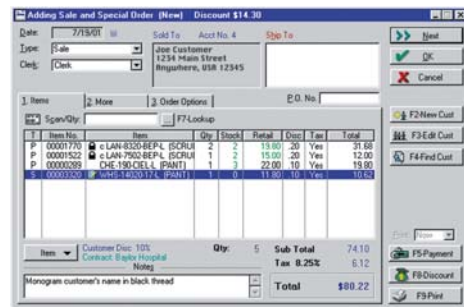

Wasp ePOS software and hardware solutions are ideal for retailers such as apparel, shoe stores, gift & card shops, bike or hobby shops and liquor or beverage retailers. It is also superb for sporting goods stores, jewelry stores, electronics/computer retailers or service stores like health stores or nail & beauty salons. Wasp has designed three software programs to handle fit the size and functional needs of different retail:

- ▶ **Wasp QuickStore ePOS software standard edition** – great for a 1 store operation with moderate traffic and inventory levels
- ▶ **Wasp QuickStore ePOS software Pro edition** - provides more robust features for larger operations with multi-lane or checkouts, or stores with higher traffic, inventory management and customer services needs
- ▶ **Wasp QuickStore ePOS software Enterprise edition** – includes all the features of Pro, plus a multi-store location ability

**Track Inventory.** Each inventory item can have a unique 12 digit UPC barcode number that identifies the item when scanned. Inventory items can have a 25 character description, a 200 character detailed description, a 5 character department code, and a 5 character fashion or order code. Set-up inventory with apparel matrix or single product SKU, and take physical inventories by scanning barcodes.

**Check-out Customers.** Create sales, layaways, and gift certificates, enter item and invoice notes, tender multiple payments, process credit card, scan items for fast and accurate check-out, and check-out two customers at once.

**Analyze.** QuickStore allows you to perform detailed sales and inventory analysis and have multiple report capability. Daily check-out and cash flow summary, and review Payment Manifest for outstanding payments.
